

Project

CO-DESIGN LEARNING FOR THE SCHOOL OF THE FUTURE (Co.De.)

Aims

The project aims to **support Europe** in tackling the early school leaving of **young students**, through the provision of concrete and **innovative e-tools to implement co-design learning paths in classrooms**, and to contribute to upskilling secondary school teachers accordingly.

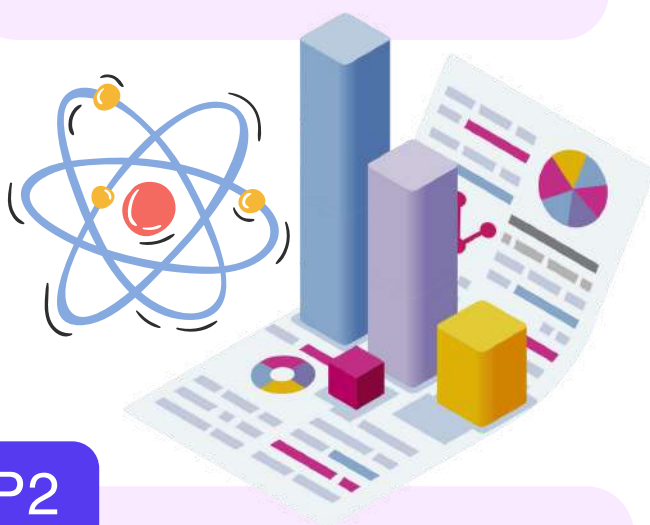

Activities

The project will foster a **new, innovative, and multidisciplinary approach to teaching and learning at schools**, promoting **innovation in education** design and delivery and introducing more "student-centered approaches" with students.

WP1

Project Management and Coordination

WP2

CO.DE. 4 Teachers

Competence model on co-design

Learning snacks on co-design

self-assessment e-questionnaire

WP4

Dissemination, Exploitation and Sustainability

To promote **understanding of early school leaving in the EU** and prevention methods through innovative actions and behaviors.

WP3

CO.DE. 4 classrooms

Co.de. Toolkit 4 Classrooms is a **Moodle-based platform** for secondary schools, promoting co-design learning through digital content, knowledge exchange, and social inclusion. It offers personalized learning with offline features like messaging, notes, surveys, forums, and assignments, tailored to students and teachers.
