

Welcome to the Second Newsletter of the Co.De. Project!

Co-Design Learning for the School of the Future - Co.De. Project

The Co.De. project in a nutshell:

The Co.De. project aims to **tackle early school leaving** by **providing innovative e-tools to implement co-design learning** paths in classrooms.

The first thread of activities will be aimed at delivering a **competence model on co-design and the micro-learning opportunities on co-design learning**, both addressed to **EU teachers from secondary schools**.

The second thread of activities will be aimed at delivering a **Co.De. toolkit 4 Classrooms**, a Moodle-based platform, designed and developed to support secondary schools (teachers and students) in **trying to use and adopt concretely the co-design learning in the classroom** through a **multidisciplinary approach**.

Co.De.'s target groups are:

- **Teachers** from EU secondary schools
- **12-18 years old students**
- **EU secondary schools**
- **The labor market and civil society**

Do not miss out on the previous Newsletter and articles already shared!!!

A focus on Work Package 2 - Co.De. 4 Teachers:

The Co.De. Consortium started working on the 'Co.De. 4 Teachers', aimed at formalizing a **Competence Model**, with skills, abilities and knowledge required in a teacher to be able to use the co-design approach in classroom, and developing an **e-questionnaire** to self-assess the teachers' readiness in co-design learning and approach and **learning snacks** for supporting them in filling gaps on co-design.

To ensure strong involvement and real adherence to the needs of the target group, the partners also organized **thematic focus groups** with teachers and instructors, whose feedback has been collected in a **comparative report** with ad-hoc suggestions for setting up and improving the Co.De. Competence Model.

While the Competence Model and the e-questionnaire are ready and will be online soon, in October the Consortium started designin **7 training learning snacks** addressed to fill the teachers' gaps in co-design learning. News soon!

Stay tuned to learn more!

Next Steps:

- Keep designing and developing the 7 Co.De. Learning Snacks
- Test the Co.De. Learning Snacks with 210 teachers in partners' countries
- Realizing and translating the Learning Snacks
- Starting the development of the 'Co.De. Toolkit 4 Classrooms', a Moodle-based platform designed and developed to support secondary schools (teachers and students) in using and adopting co-design learning in the classroom through a multidisciplinary approach.
